Assignment No. : 5

Allotment Date: 25 October 2023

S.NO.	QUESTIONS	MARKS	NATURE										
1.	Multiple choice questions: (i) Terrestrial habitat consist (a) forest (b) ocean (c) river (ii) Motion in a straight line is called- (a) circular motion (b) rectilinear motion (c) periodic motion	1x2=2	Information										
2.	Fill in the blanks: (i) Non living components of habitat are called _____. (ii) Motion of swing is the example of _____. (iii) _____ is the disease caused by vitamin B1. (iv) SI unit for length is _____.	1x4=4	Understanding										
3.	Match the following : <table style="width: 100%; border: none;"><tr><td style="text-align: center;">A</td><td style="text-align: center;">B</td></tr><tr><td>(i) acclimatisation</td><td>(a) component of habitat</td></tr><tr><td>(ii) Arbitrary unit</td><td>(b) rotational motion</td></tr><tr><td>(iii) Biotic</td><td>(c) make small adjustments</td></tr><tr><td>(iv) Spinning top</td><td>(d) handspan</td></tr></table>	A	B	(i) acclimatisation	(a) component of habitat	(ii) Arbitrary unit	(b) rotational motion	(iii) Biotic	(c) make small adjustments	(iv) Spinning top	(d) handspan	4X0.5 =2	Understanding
A	B												
(i) acclimatisation	(a) component of habitat												
(ii) Arbitrary unit	(b) rotational motion												
(iii) Biotic	(c) make small adjustments												
(iv) Spinning top	(d) handspan												
4.	(i) What do you mean by motion? (ii) What do you mean by Organisms ? (iii) What do you mean by Traditional method of measurement? (iv) Write difference between abiotic and biotic component?	2x4=8	HOT										
5.	(i) Define parallax error. (ii) Define terrestrial habitat. (iii) What do you mean by SI unit?	3x2=6	Interdisciplinary										
6.	(i) What do you mean by Circular motion? (ii) What do you mean by aquatic habitat? (iii) Explain properties of living organism?	2x3=6	Analytical Skill										
7.	Read the following passage and answer the following: In the sea, plants and animals are surrounded by saline (salty) water. Most of them use the air dissolved in water. There is very little water available in the desert. It is very hot in the day time and very cold at night in the desert. The animals and plants of the desert live on the desert soil and breathe air from the surroundings. The sea and the desert are very different	2x2=4	Communication Skills										

surroundings and we find very different kind of plants and animals in these two region. Let us look at two very different kind of organisms from the desert and the sea – a came land a fish. The body structure of a camel helps it to survive in desert conditions. Camels have long legs which help to keep their bodies away from the heat of the sand. They excrete small amount of urine, their dung is dry and they do not sweat. Since camels lose very little water from their bodies, they can live for many days without water.

Let us look at different kinds of fish. The thing that is common in all fish is their streamlined shape, which helps them move inside water. Fish have slippery scales on their bodies. These scales protect the fish and also help in easy movement through water. Fish have flat fins and tails that help them to change directions and keep their body balance in water. Gills present in the fish help them to use oxygen dissolved in water.

(i) What help fish to change their directions in water?

- (a) Gills
- (b) Flat fins
- (c) Tails
- (d) Both (a) & (b)

(ii) Fish breathe through their-

- (a) Tail
- (b) Scales
- (c) Gills
- (d) None of the above
