Allotment Date: 20 November 2023

S. NO.	QUESTIONS	MARKS	NATURE
1	Read the Passage carefully. My next pet was a pigeon, the most revolting bird to look at, with his feathers pushing through the wrinkled scarlet skin, mixed with the horrible yellow down that covers baby pigeons and makes them look as though they have been peroxiding their hair. Because of his repulsive and obese appearance, we called him Quasimodo. Since he had an unorthodox upbringing, without parents to teach him, Quasimodo became convinced that he was not a bird at all, and refused to fly. He walked everywhere. He was always eager to join us in anything we did. He would even try to come for walks with us. So you had to either carry him on your shoulder, which was risking an accident to your clothes, or else you let him walk behind. If you let him walk, then you had to slow down your own pace to suit his, for should you get too far ahead, you would hear the most frantic and imploring coos and turn around to find Quasimodo running desperately after you. On the basis of your reading choose the correct options for the given statements: 1. The narrator describes the pigeon as a 'revolting bird' because (a) He could not fly (b) He had to be carried everywhere (c) He had wrinkled skin covered with yellow feathers (d) He was fat. 2. Quasimodo got his name because (a) He was fat and ugly (b) He was attractive (c) He could not fly (d) He loves behaving like human beings 3. We know that Quasimodo was always eager to go on walks because (a) He walked everywhere (b) He did not know how to fly (c) He complained loudly if he was not taken along (d) He always copied whatever humans did 4. Quasimodo protested when he was (a) Left at home (b) Lifted on human shoulders (c) Taken for a walk (d) Left behind during walks.	5 Marks	Informative and Understanding

	5. The phrase 'risking an accident to your clothes' means (a) The bird pecked at their clothes (b) There was a chance of the bird soiling their clothes (c) The bird risked a fall (d) The bird did not like their clothes		
2.	Read the given passage carefully and answer the questions that follow: One day she spoke to Jumman, "My son, it is now obvious that I am not wanted in your house. Kindly give me a monthly allowance so that I can set up a separate kitchen." "My wife knows best how to run the house. Be patient," said Jumman shamelessly. This made his aunt very angry and she decided to take her case to the village panchayat. 1.Who does 'she' refer to? 2.What did she complain of? 3. What was Jumman's shameless reply? 4. Find a word from the above passage that means the same as to '**clear'.**	4 Marks	Problem Solving
3,.	Read the given passage carefully and answer the questions that follow: When the gong sounds ten in the morning and I walk to school by our lane, Every day I meet the hawker crying, "Bangles, crystal bangles! There is nothing to hurry him on, there is no road he must take, no place he must go to, no time when he must come home. I wish I were a hawker, spending my day in the road, crying, "Bangles, crystal bangles!" 1. When does the gang sound? (a) 10 a.m (b) 11 a.m (c) 8 a.m 2.**The poet walks to school by _____** **(a) lane** **(b) road** **(c) street** **3.Who is crying "Bangles crystal bangles"!** **(a)The shopkeeper** **(b) The hawker** **(c) The driver**	3 Marks	Critical Thinking

Q 7.	Read the following passage and answer the following: **Kaleidoscope**, optical device consisting of mirrors that reflect images of bits of coloured glass in a symmetrical geometric design through a viewer. The design may be changed endlessly by rotating the section containing the loose fragments. The name is derived from the Greek words *kalos* (“beautiful”), *eïdos* (“form”), and *skopeïn* (“to view”). The kaleidoscope was invented by Sir David Brewster about 1816 and patented in 1817. Sold usually as a toy, the kaleidoscope also has value for the pattern designer. The kaleidoscope illustrates the image-forming properties of combined, inclined mirrors. If an object is placed between two mirrors inclined at right angles, an image is formed in each mirror. Each of these mirror images is in turn reflected in the other mirror, forming the appearance of four symmetrically placed objects. If the mirrors are inclined at 60°, a hexagonally symmetrical pattern results from one object producing six regularly placed images. A simple kaleidoscope consists of two thin, wedge-shaped mirror strips touching along a common edge or of a single sheet of bright aluminum bent to an angle of 60° or 45°. The mirrors are enclosed in a tube with a viewing eyehole at one end. At the other end is a thin, flat box that can be rotated; it is made from two glass disks, the outer one ground to act as a diffusing screen. In this box are pieces of coloured glass, tinsel, or beads. When the box is turned or tapped, the objects inside tumble into an arbitrary grouping, and when the diffusing screen is illuminated, the sixfold or eightfold multiplication creates a striking symmetrical pattern. The number of combinations and patterns is effectively without limit. (**1) Who invented Kaleidoscope?** **(2) What do you mean by Kaleidoscope?**	2x2=2	Communication Skills
