20.	Read the given case carefully and answer the questions that follow: Harish belonged to a family of four children, him being the eldest. Unlike any first born, he was not given the attention he should have had. His father worked as an accountant, while his mother stayed at home to look after the kids. He dropped out of school and could barely manage to get work for a little salary. His relationship with his family played an important role in building his disposition. He felt a certain feeling of insecurity with his siblings, especially his brother Tarun, who was able to finish college because of parental support. Due to the hopelessness Harish felt, he started engaging in drinking alcohol with his high school friends. Parental negligence caused emotional turmoil. He also had insomnia which he used as a reason for drinking every night. Over time, Harish had to drink more to feel the effects of the alcohol. He got grouchy or shaky and had other symptoms when he was not able to drink or when he tried to quit. In such a case, the school would be the ideal setting for early identification and intervention. In addition, his connection to school would be one of the most significant protective factors for substance abuse. His school implemented a variety of early intervention strategies which did not help him as he was irregular and soon left school. Some protective factors in school would be the ability to genuinely experience positive emotions through good communication.  (i)It has been found that certain family systems are likely to produce abnormal functioning in individual members. In the light of the above statement, the factors underlying Harish's condition can be related to model.
